Ergonomic Solutions / Mini Hand Pallet Trucks

PRODUCT OVERVIEW

Just when it seemed the mini pallet truck couldn't get any smaller, they found a way to make it even more compact! At first glance the overall design may appear to be unchanged, but the features are hidden in plain sight. Not only does the handle now fold down, but the fork tips fold up and back. To better secure the handle in the down position, pre-drilled mounting holes are provided to connect the handle to a welded on bracket. While some things have changed, the always dependable powder coated steel construction has remained.
