## PRODUCT OVERVIEW

No one wants to move heavy drums by hand. That is dangerous, injury prone work. What's easier and safer, is installing a drum gripper! This drum gripper quickly secures each drum; simply start above the drum and lower the arms until it reaches the middle of the drum. With help from the wide arm layout, the drum can be grasped and maintained in the upright position. And don't worry about any damage to the drum; the gripper has a smooth powder coated finish!
